Hyper 31 Valveless Hammer

90mm (3 1/2") - 100mm (4") diameter holes

The Hyper is a valveless D.T.H Hammer designed for drilling 90mm-100mm (3 1/2" - 4") diameter holes over a wide range of operating air pressures. The Hyper 31 is supplied with a 2 3/8" API reg. pin backhead as standard but other connections are available on request. A positive fitting water check valve guards against ingress of ground water when the air is shut off.

The Hyper 31 accepts as standard, the Mach 33 Button Bit, although bits with Mission A3015, Sandvik XL3 and Ingersoll Rand 3.5 shanks can also be used by simply making a few minor component changes. Alternatively the Hyper 31 can be supplied initially to suit any of these bits.
